This listing of claims will replace all prior versions, and listings, of claims in the application:

The Status of the Claims

- 1-4. (Cancelled)
- 5. (Currently Amended) <u>A detection apparatus to identify a program comprising:</u>

a tuner to tune to the program;

a meter coupled to the tuner to record a media link embedded in the program tuned by the tuner; and

a program identifier to identify the program tuned by the tuner based on the media link recorded by the meter. The detection apparatus of claim 1 wherein the program identifier is arranged to identify the program by accessing a content provider.

- 6-23. (Cancelled)
- 24. (Previously Presented) A program identification system comprising:
 - a tuner tunable to at least one of a plurality of channels;
- a meter coupled to the tuner, wherein the meter is arranged to detect a media link embedded in a program carried in a channel tuned by the tuner and to extract a broadcast signature from the program; and

a comparator arranged to generate a subset of reference signatures from a library of reference signatures based upon the media link, and to compare the broadcast signature extracted by the meter to the subset of reference signatures.

25. (Cancelled)

- 26. (Previously Presented) The program identification system of claim 24 wherein the media link is a URL.
- 27. (Previously Presented) The program identification system of claim 24 wherein the media link is a code referenced to a URL.
- 28. (Previously Presented) The program identification system of claim 24 wherein the media link is a trigger.

29. (Cancelled)

30. (Previously Presented) The program identification system of claim 24 wherein, if the broadcast signature does not have an embedded media link, the comparator is arranged to generate a second subset of reference signatures from the library of reference signatures based upon a hash code, and to compare the broadcast signature extracted by the meter to the second subset of reference signatures.

- 31. (Previously Presented) The program identification system of claim 24 wherein the reference signature includes an identification of the program.
- 32. (Previously Presented) The program identification system of claim 24 wherein the broadcast signature includes the channel and a time at which the broadcast signature is extracted.
- 33. (Previously Presented) The program identification system of claim 32 wherein the reference signature includes an identification of the program.

34-47. (Cancelled)

- 48-49. (Cancelled) The detection apparatus of claim 1 wherein the media link is a hyperlink.
- 50. (Previously Presented) The program identification system of claim 24 wherein the media link is a hyperlink.
